Observations and Corrective Actions

Violations cited in this report must be corrected within the time frames below, or as stated in sections 8-405.11 of the food code.

- 8 2-301.14 When to Wash (P) Employee working at the dish machine was touching soiled utensils, loading the dish machine and then touching clean utensils. Employees shall clean their hands and exposed portions of their arms as specified under 2-301.12 immediately before engaging in food preparation including working with exposed food, clean utensils, and unwrapped single service and single use articles. When the employee was instructed to wash hands the towel was not used to turn off faucet after washing hands thus re-contaminating hands. REPEAT.
2-301.12 Food employees shall clean their hands and exposed portions of their arms for at least 20 seconds. P When the employee attempted to wash hands properly after being notified they applied soap but kept the hands under the water. Hands need to be washed back from the water for at least 20 seconds before rinsing. CDI employee totally re-washed hands using the correct procedure and using the towel to turn off the faucet to prevent recontamination of hands.
- 14 3-203.12 Retain tag on the bag of shellstock until empty. Record date on the tag when the last shellstock from the container is sold. Store tags in chronological order for 90 days. Pf Shellstock tags are being kept for 90 days, but they are not in chronological order and it was not clear on the date when the last shellstock for the container was sold. Shellstock tags shall be maintained in the establishment for 90 days in chronological order with the date the last shellstock was sold indicated on the tag. Verification required for the last 90 day supply of tags that they are in order and have the date the last shellstock was sold. Contact Nathan Ward at 336-462-7778 when shellstock tags are in order with dates. This must be completed by 3-31-24.
- 15 3-302.11 Packaged and Unpackaged Food - Separation, Packaging, and Segregation (P) Raw ground beef stored with unpackaged and re-wrapped vegetables in the walk in freezer. Raw sausage stored over steak in the walk in cooler and raw fish stored above cooked quail in the reach in cooler. REPEAT. Unwashed produce stored over washed and prepared onions in the walk in cooler. Food shall be protected from contamination by separating raw animal foods from ready to eat foods, separating different types of raw animal foods from each other and separating fruits and vegetables before they are washed from ready to eat foods. CDI vegetables moved away from ground beef in walk in cooler, cooked quail placed above raw fish, raw sausage moved below the steak, and onions that had been washed moved away from unwashed produce.
- 20 3-501.14 Cooling (P) Raw tilapia, scallops, shrimp, and octopus placed into make unit to cool. They were checked at 12:12 at 47 degrees. Checked again at 12:32 and had not cooled below 47 degrees. The scallops stayed at 43 degrees. TCS foods prepared at ambient temperatures shall be cooled to 41 degrees within 4 hours. The products had been cooling for 2 hours and in right fitting containers. It is questionable as to whether the products would have reached proper temperature without intervention. CDI all items placed into walk in freezer and cooled to 41 degrees within 20 minutes.
- 21 3-501.16 (A) (1) Time / Temperature Control for Safety Food, Hot and Cold Holding (P) Salsa Verde, Red Sauce and White Sauce in steam table at 130-133 degrees. The water in the steam table was low and below the level of the food. The temperature of the water was 150 degrees. TCS foods shall be maintained at 135 degrees or above when held hot. CDI all sauces were rapidly reheated to 180-200 degrees and placed back onto the steam table.
- 25 3-603.11 Provide consumer advisory for animal foods served raw or under-cooked. Consumer advisory must include disclosure and reminder. Pf The lunch menu had huevos rancheros that did not have the disclosure for the undercooked eggs. CDI this menu item was marked off menu until menu can be re-printed.
3-603.11 Disclosure shall identify the animal-derived food by asterisking them to a footnote that states that the items are served raw or undercooked, or contain (or may contain) raw or undercooked ingredients. Pf Raw salmon provided on the menu but did not have the asterisk referencing the item to the bottom of the menu where the disclosure and reminder is located. The disclosure must identify the animal derived food that is being served raw or undercooked. CDI asterisk placed on all menus to make correction.
- 33 3-501.15 Cooling Methods (Pf) Raw shrimp, fish, scallops, and octopus being cooled in make unit in tightly covered containers. The make unit is not designed for cooling. REPEAT. Cooling shall be accomplished in accordance with time and temperature in 3-501.14 by placing the food in shallow pans, separating the food in smaller or thinner portions, using rapid cooling equipment, stirring the food in a container placed in ice water bath, using containers that facilitate heat transfer, adding ice as an ingredient or other effective methods. CDI all items placed into walk in freezer and cooled to below 41 degrees in 20 minutes.
- 39 3-305.11 Food Storage - Preventing Contamination from the Premises (C) REPEAT Sugar and Oil stored in the outside storage building that is unfinished. The permit condition specifically states that foods or equipment that supports restaurant operation shall not be stored in this building. Food shall be stored so that it is not exposed to dust or other contamination and at least 6" off the floor. Verification required within 10 days 3-31-24 that items have been removed from building to comply with permit condition or building can be properly finished to meet storage requirements for food.

- 43 3-304.12 In-Use Utensils, Between-Use Storage (C) The ice scoop was stored down in the ice with the handle buried in the ice. The scoop shall be stored with the handle extending out when stored in the food product REPEAT. Several utensils were stored in water at a temperature of 120 degrees. In use utensils when stored in water between uses shall be stored in water at a temperature of 135 degrees or above and in a container cleaned at the proper frequency in 4-602.11 (D) 7. Tongs also stored on oven handles. In use utensils shall be stored on a clean surface, in water greater than 135 degrees, in the food product with handles extending out, or in running water of sufficient velocity to flush particles to the drain, if used with moist foods such as mashed potatoes or ice cream.
